Gestion De Usuarios En La API De Petstore

Under 1 Second (Duration) (2a5b6a7be0f08df02d8ab0b4d4c68648c2695c6c7ef0658c71de4d42b1415b18.html)

Crear, consultar y actualizar un usuario exitosamente

Cast

	Steps	Outcome	
✓	Dado que el usuario automatizado se conecta a la API de Petstore	SUCCESS	127ms
✓	Cuando lee los datos del usuario desde el archivo Excel	SUCCESS	513ms
▼	Y realiza la solicitud para crear el usuario (javaScript:void(0))	SUCCESS	7s 924ms

(javaScript:void(0))

Automationuser crear usuario (javaScript:void(0)) (javaScript:void(0)) *SUCCESS* *7s 612ms*

AutomationUser executes a POST on the resource /user (javaScript:void(0)) (javaScript:void(0)) *SUCCESS* *7s 509ms*

POST https://petstore.swagger.io/v2/user

REST Query

Response

URL: https://petstore.swagger.io/v2/user

Status code: 200

Content Type: application/json

Request Headers

```
Accept=*/*
Content-Type=application/json
```

Content Body

```
{
    "id": 101,
    "username": "qa_user_test"
}
```

SUCCESS

Response Headers

```
Date: Tue, 10 Nov 2026 16:13:39 GMT
Content-Type: application/json
Transfer-Encoding: chunked
Connection: keep-alive
Access-Control-Allow-Origin: *
Access-Control-Allow-Methods: GET, POST, DELETE, PUT
Access-Control-Allow-Headers: Content-Type, api_key, Authorization
Server: Jetty(9.2.9.v20150224)
```

Response Body

```
{
    "code": 200,
    "type": "unknown",
    "message": "101"
}
```

Response Cookies

Entonces el código de respuesta HTTP debe ser 200 (javaScript:void(0)) (javaScript:void(0)) SUCCESS 422ms

Then El código de estado de la respuesta should be (200) *SUCCESS* *026ms*

Cuando realiza la solicitud para consultar el usuario creado (javaScript:void(0)) (javaScript:void(0)) SUCCESS 1s 089ms

Automationuser consultar usuario (javaScript:void(0)) *SUCCESS* *1s 060ms*
(javaScript:void(0))

AutomationUser executes a GET on the resource /user/{username} (javaScript:void(0)) *SUCCESS* *1s 002ms*
(javaScript:void(0))

GET https://petstore.swagger.io/v2/user/qa_user_test

REST Query

Response

URL: https://petstore.swagger.io/v2/user/qa_user_test

Status code: 200

Content Type: application/json

Request Headers

```
Accept=*/*
Content-Type=application/json
```

Response Headers

```
Date: Tue, 10 Nov 2026 16:13:41 GMT
Content-Type: application/json
Transfer-Encoding: chunked
Connection: keep-alive
Access-Control-Allow-Origin: *
Access-Control-Allow-Methods: GET, POST, DELETE, PUT
Access-Control-Allow-Headers: Content-Type, api_key, Authorization
Server: Jetty(9.2.9.v20150224)
```

SUCCESS

Response Body

```
{
    "id": 101,
    "username": "qa_user_test",
    "userStatus": 0
}
```

Response Cookies

Entonces el código de respuesta HTTP debe ser 200 (javaScript:void(0)) SUCCESS 009ms
(javaScript:void(0))

Then El código de estado de la respuesta should be (200) *SUCCESS* *004ms*

Cuando realiza la solicitud para actualizar el usuario (javaScript:void(0)) SUCCESS 1s 029ms
(javaScript:void(0))

Automationuser actualizar usuario (javaScript:void(0)) (javaScript:void(0)) *SUCCESS* *1s 016ms*

AutomationUser executes a PUT on the resource /user/{username} (javaScript:void(0)) (javaScript:void(0)) *SUCCESS* *962ms*

PUT https://petstore.swagger.io/v2/user/qa_user_test

REST Query

Response

URL: https://petstore.swagger.io/v2/user/qa_user_test

Status code: 200

Content Type: application/json

Request Headers

```
Accept=*/*
Content-Type=application/json
```

Content Body

```
{
    "id": 101,
    "username": "qa_user_test"
}
```
